

Aluminium Colour Chart

Below is our 'House' colour range. By providing a limited range of colours that are used more frequently we are able to offer these colours at a more competitive price.

Our aluminium range of windows and doors can also be dual coloured, ie where the colour inside is different to the colour outside.

In addition to the range below we also provide colours in any RAL colour of your choosing, including realistic wood effects, stippolyte effects and metallic paint options.

For technical reasons associated with colour reproduction, the colours shown give an indication of shade. No guarantee can be given that they will match the powder product.

Colour references shown in this chart are for internal use only and are not suitable for matching with product supplied elsewhere.
